

Art.No 875 - 12

Blasocut 2000 CF

Description

Blasocut 2000 CF is a water miscible, chlorine free, mineral oil-based cutting fluid.

Range of application

Universal cutting fluid designed for general machining of cast iron, steel and aluminum alloys.

Product properties

Universal

Mild formulation without bactericides

High cutting performance

Benefits

for all common materials and machining operations

good human and skin compatibility

long tool life

Physical-chemical data

Concentrate

Colour	green
Mineral oil content	65%
Water content	4%
Density at 20°C	0.94 g/cm ³
Viscosity at 40°C	43 mm ² /s
Flash point	144°C
pH-value	
Refractometer factor	

Emulsion

milky, green

Note

The product does not contain:
Chlorine*, heavy metals, boron, amine, secondary amine, silicone, bactericide, formaldehyde, nitrosamine.

*Without active addition of chlorinated EP additives.

Concentration of use

Variable concentrations from 5 - 15%
Best results machining: 7 - 10%

Packaging units

25 / 208 / 1000 liters

Information contained in this data sheet is based upon the properties and applications of use as known to us. However, generally no legal liability may be deducted from such information.
